## AUTHOR INDEX

References are to review numbers; an Errata section may be found at the end of this Index. Russian authors are listed under the transliterated spelling of Russian used by Mathematical Reviews (see table at the end of this issue). Surnames consisting of more than one part (e.g., von Neumann, de Boer, etc.) are listed under the first capital letter.

Items without indicated authors are usually listed separately in the Key Index, which follows the Author Index. Collections of papers for which an editor (or editors) is named are either listed or referred to under the editor's name; e.g., Bak, Thor A. (Editor). They are also usually listed in the Key Index. A star (★) before a title indicates that the item is a book, while a dagger (†) indicates that reference is made to the item in the Errata section.
